Hello, welcome to csoahelp

We offer various interview support services

PRICE

359 USD onwards
OA writing

298 USD onwards
Interview Assistance

898 USD onwards
Interview Proxy

149 USD onwards
Other Services

We also offer other technical services, including but not limited to resume creation, BQ practice, project building, algorithm tutoring, assignment tutoring, systematic learning of front-end and back-end AI, mock interviews, and other support services.he pricing is very affordable, starting at 149USD per hour.For new customers, the first hour of this service can be refunded unconditionally.

OA GhostWriting

introduction

- We charge for OAs based on time limits

359 USD onwards — UNDER 2 HOURS

718 USD onwards — 2-4 HOURS

and so on

- Our OA service ensures that algorithm and SQL questions pass all test cases.
- We use remote control software ToDesk for OA, ensuring it is undetectable.

The reason is that platforms like Hackrank and CodeSignal are just web pages, and browsers have strictly limited their permissions, so they cannot detect the use of our remote control software.Some OAs may ask you to share your screen and turn on the camera, but we can avoid detection. Please rest assured.

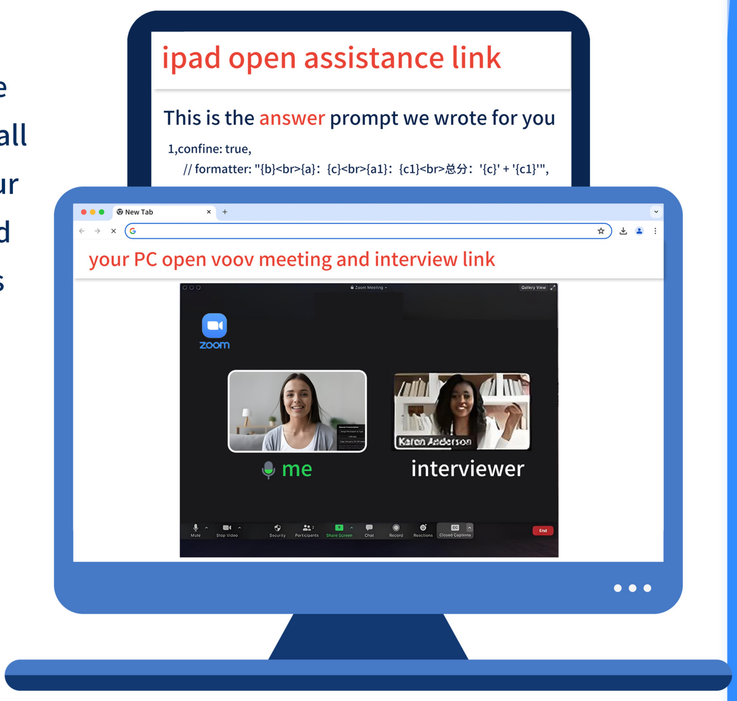
Interview Assistance

Assistance process

1. Confirm the interview time with us and pay a deposit, which is half of the total price.
2. Our assistance does not cover personal information-related questions, so BQ questions, self-introduction, project resume dives, etc., are not included in our service. You need to prepare these yourself.
3. After paying the deposit, follow our instructions to install the software and prepare the hardware.
   (We do not accept inquiries regarding technical details of debugging before the deposit is paid.)
4. During the interview, we can observe all details of your interview and send you tips via another device.



Pricing

The quotation is as follows:

target company	First tier large company	Second tier large company / unicorn	startup
1st round	$598	$498	$398
2nd round	$698	$598	$498
3rd round	$798	$698	$598
Final	$998	$898	$798

Interview Proxy

introduction

We use lip-syncing for interview proxies. Although there are many AI face-changing tools available, they are not fully mature. We have a fully developed process.

flow path

1. Confirm the interview time with us and pay a deposit, which is half of the total price.
2. Provide us with a detailed script of your personal information, including city, visa status, alma mater, personal introduction, the position you applied for, and detailed descriptions of each project.
3. Before the interview, we will come to help you adjust the equipment in advance to support the proxy.
4. We will listen to your voice and adjust it slightly using a voice modulator to match yours.
5. We will take control of your computer remotely, attend the interview, and write code during the interview.
6. We complete the entire interview with your camera on. You will need to sync your mouth movements slightly when we speak.

Pricing

types	First tier large factories	Second tier large factories/unicorn	strartup
1st round	$1880	$1570	$1250
2nd round	$1998	$1880	$1570
3rd round	$1998	$1998	$1880
Final	$1998	$1998	$1998

Job Hunting Plan Entrustment

introduction

First, it is essential to clarify that the full package with a guaranteed offer does not promise an offer from a specific company but includes our services until you receive any offer within a given period.

- The service period for the full package is currently one year, ending when the client receives any offer.
- The price includes a 5000USD upfront deposit, and after receiving the offer, you will pay the remaining balance of 10000USD + 15% of the annual package.
- The annual package includes one year's salary, stock options, signing bonuses, relocation benefits, etc.
- The full package requires real-name verification, signing a contract with our company, and providing ID documents. If interested, please contact us privately.

QA

Can you explain the pricing table's cells?

- Each cell in the table represents the price for one interview service.An interview should not exceed one hour. If it does, the price will be calculated as multiple interviews.For example, if Amazon conducts four consecutive interview assistance sessions, the total price would be 398+498+598+798 USD.
- If it is the same team in the same company, the cumulative cost will increase progressively.If you change teams or companies, the pricing will restart from the first round.
- For companies with more than 4 rounds, any round beyond the 4th will be charged at the price of the first round.

How do you distinguish between top-tier companies, second-tier companies, and startups?

- Top-tier companies include FAANG + Microsoft + Nvidia.
- Startups include all companies with fewer than 100 employees.
- Second-tier companies/unicorns include most of the remaining companies, such as TikTok.

What if the lip-sync during the interview proxy doesn’t match?

This can be explained simply: as mentioned in the image, a script is required. Before the proxy, we will practice with you for an hour.We ensure that the lip-sync is perfectly matched for the first 5 minutes.Afterward, during the coding part, your lip-sync won't be scrutinized too closely, so slight matching will suffice.Of course, there may be imperfections. If you're overly anxious and have some interview skills, we recommend choosing the assistance service instead.

Can you guarantee a pass?

We surpass the interview level of most top university graduates and job-switchers from prestigious companies. However, there are many factors beyond performance that affect passing, so please understand this limitation.

What if the interviewer asks me to share my screen during the interview?

- First, most companies will not require screen sharing as they use their own coding platforms for interviews.
- Secondly, you can choose to share just one application instead of the entire desktop.
- If you're still concerned, please download and log in to the Discord client. Enter the meeting 10 minutes before the interview and notify our staff that you'd like to use Discord.They will guide you through the process.
- Using Discord for interview assistance is completely undetectable.Screen-sharing functions between different software will not conflict and cannot detect each other.

Is interview assistance mainly in text or voice?

For interview services, we primarily provide text-based assistance.Everything you need to explain to the interviewer—code explanations, time complexity, work thoughts, common concepts, system design—will be written as annotations.We don’t just provide code.Voice services make it hard to repeat complex technical terms. Our text prompts are fast enough to ensure that you won't be delayed in responding during the interview.

It's too expensive. Can I get a discount?

We understand your current financial difficulties and are eager to help you achieve your career goals.
However, to maintain company operations and provide high-quality services to all clients, we must be responsible for our profit and ensure it is not compromised.Thus, our pricing is transparent and equal for all, and we cannot offer discounts.We hope to help you stand out in interviews through our services and achieve your dream of joining a top-tier company.If you have any further questions, feel free to contact us anytime.

What payment methods do you support? Do you support Venmo and Zelle?

Since our company is based in Japan, we are currently unable to accept Venmo or Zelle.However, we have a corporate account with a Japanese corporation. You can pay via ACH transfer, Wire transfer, or through a third-party payment tool like Wise.
